

CHEMTEC®

Updated Tradition

Founded in 2010, **CHEMTEC** is a young and dynamic company specializing in formulation, production, and commercialization of comprehensive technologies on a global scale for the industrial finishing sector.

Our mission is **UPDATED TRADITION**: CHEMTEC's technologies are revolutionary, cutting-edge, and environmentally friendly, paying attention customer needs.

WHAT WE OFFER:

- CHEMICALS FOR SURFACE TREATMENT
 - > TORAN 3® Single-stage pre-treatment
 - > Pre-treatment nanotechnologies
 - > Cleaning and phosphating
- INDUSTRIAL WASTEWATER TREATMENT
- PAINT STRIPPERS
- SERVICES AND CONSULTING

CHEMICALS FOR SURFACE TREATMENT

TORAN 3 ® Single-stage pre-treatment

Unique, innovative processes, completely different from the traditional technologies on the market for degreasing, phosphating and pre-treatment of paint metals, in a single cold stage without disposal.

Pre-treatment nanotechnologies

Technologically advanced processes to replace microcrystalline phosphates based on heavy metals (Zinc, Nickel, Chromium).

Cleaning and phosphating

In CHEMTEC product range, there are a series of products for every application: for degreasing, cleaning, phosphating, pickling and passivation of iron, galvanized sheet metal, aluminum and light alloys.

INDUSTRIAL WASTEWATER TREATMENT

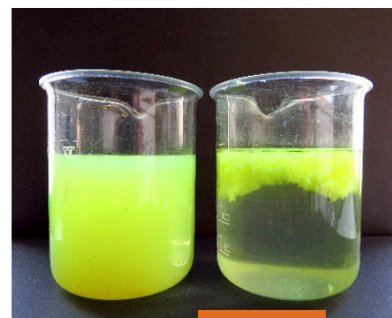

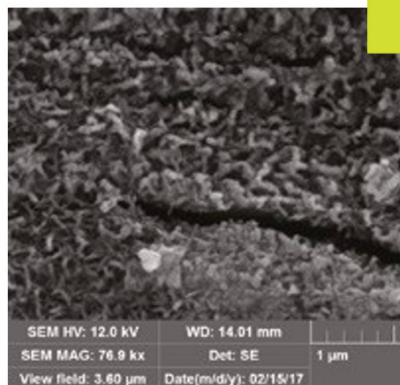

CHEMTEC has a complete range of chemical products as well as plants dedicated to the industrial wastewater treatment for paint booths, for every industrial process water and for the treatment of clear water (reverse osmosis, demineralization).

PAINT STRIPPERS

CHEMTEC has developed a range of non-toxic paint strippers extremely effective in the short time, even at low temperatures on metals and silicone masking.

SERVICES AND CONSULTING

The CHEMTEC laboratory is equipped with instruments able to perform a complete set of tests to verify the mechanical properties, all the characteristics of a painting cycle and the corrosion resistance, including the ACET method to replace the salt spray test.

Chemtec®
Updated tradition.
